

Connecting sideKick to Hog2, thru MIDI.

This document describes how to connect the ELC sidekick fader panel to the wholehog2 console.

Setup MIDI rock wing connection.

Follow the next steps.

- Connect the MIDI output of the sidekick to the MIDI input of the Hog2.
- On the Hog2
 - Press Setup
 - Press Input Panel
 - Switch on the Midi In button (top of the screen)
- On the sidekick
 - Press the Left and Right button together under the display.
 - Use the Encoder to select the "HogII Midi Wing" configuration
 - Press Select (Right button under the display)

The Hog2 should now give you a message "Rockwing Found".

The top row of buttons act as "Choose"

The next row of buttons act as "Go"

The fader acts as "fader" (sorry I couldn't think of any other use)

The bottom row of buttons act "Flash"

Reconnection

It is important when reconnecting the hog2 is fully started up before switching on the sidekick.

Troubleshooting

When the sidekick does not seem to work, the hog2 might not have recognized the sidekick. Please switch off the sidekick and back on.
