Product ref: FHS3

Riggers radio remote control

This UHF wireless remote control unit is designed for remotely controlling lights, when away from the desk while focusing.

The system comprises a battery-operated handheld controller, and a mains-powered base station that connects between the lighting desk's DMX output and the dimmers.

Features include:

- 50 recordable cue states
- Merged DMX input from the lighting desk
- Individual channels and groups can be addressed and stored
- May be used without the main lighting desk being active
- Provides remote control and backup desk functionality
- Range:
75m (internal venue)
200m (open space)
